Profile

Detail-oriented Software Engineer with experience in full-stack development, testing, and deployment of scalable systems. Skilled in designing robust applications, integrating APIs, and collaborating with cross-functional teams to deliver secure, maintainable solutions.

Experience

Crugen Media Limited – Software Engineer (Contract)

July 2025 – April 2026

- Designed and developed scalable web and software applications (front-end and back-end) aligned with client and business requirements.
- Led system architecture discussions and contributed to database design, API integrations, and legacy system interoperability.
- Implemented and enhanced user interfaces with attention to performance, security, and user experience.
- Developed and executed automated and manual testing strategies (unit, integration, regression) to ensure system reliability.
- Collaborated with cross-functional teams and stakeholders to translate requirements into robust technical solutions while maintaining high coding standards.

Crugen Media Limited – Junior Software Engineer (Contract)

June 2022 – June 2025

- Developed and maintained front-end and back-end features for business applications and websites to support client objectives.
- Assisted in planning, designing, and implementing new software systems, interfaces, and enhancements.
- Ensured system compatibility, interoperability, and adherence to coding standards and industry best practices.

- Wrote unit and integration tests, developed automation tools, and participated in code reviews to maintain high code quality.
- Documented solution components, technical specifications, and user manuals; maintained version control across deliverables.
- Collaborated with team members to integrate APIs, conduct system upgrades, and provide user training and technical support.
- Researched emerging technologies and proposed improvements to enhance system performance and scalability.
- Delivered solutions under tight deadlines while contributing ideas for product innovation and future enhancements.

Crugen Media Limited – Web Developer Intern

December 2021 – May 2022

- Developed front-end and back-end features for business websites and applications to support organizational objectives.
- Assisted in planning, designing, and implementing software systems, interfaces, and enhancements.
- Collaborated with management to define client business requirements and translate them into technical solutions.
- Ensured system compatibility, interoperability, and performance across multiple platforms.
- Contributed to solution documentation, maintained version control, and supported patch management, upgrades, and security requirements.
- Conducted research on feasible technical solutions to align with business and operational needs.

Education

Bachelor of Applied Science in Computer Engineering, University of Trinidad and Tobago, 2021

Diploma in Software Engineering, University of Trinidad and Tobago, 2018

Certifications

- Huawei, Data Management and Analysis , 2022

- Huawei, Seeds for the future sky Graduate, 2020
- Udemy, Build an MVC framework using PHP, 2022
- Udemy, Design Rules - Principles + Practices for Great UI Design, 2022

Technical Skills

- Programming: Java, JavaScript, C++, C#, PHP
- Web: HTML, CSS, jQuery, Ajax
- Databases: MySQL, SQL Server, Firebase NoSQL
- Tools/Frameworks: Visual Studio, Android Studio, Dreamweaver, MVC patterns
- Testing: Unit, integration, black-box, white-box, regression
- Other: Microsoft Office (Word, Excel, PowerPoint, Project), Git version control
